# What's Next?

## Forecast for next several days

January 25, 2026  
4:08 AM

- Behind the winter storm, high temperatures in the 20s and 30s through Thursday, along with lows in the single digits and teens, will extend the time it takes for any snow on the ground to melt.
- Breezy winds 15-25 mph Monday evening into Tuesday morning could push loose snow around.
- More sunshine will occur Monday through midweek, but temperatures will remain near or below freezing, which will limit the snow melt.

## DON'T FORGET YOUR PETS

Even with a natural fur coat, winter can be **deadly** for your pets unless proper care is given.

Keep them warm and dry, and indoors whenever possible.

Provide plenty of food and water. Dehydration is especially dangerous in winter.

When outside, keep them bundled up. Limit outside time, and thoroughly clean (including paws) when bringing them in

## NO OLVIDE A SUS MASCOTAS

Incluso con su capa de pelo natural, el invierno puede ser mortal para sus mascotas sin el cuidado adecuado.

Manténgalas calientes y secas, y en interiores de ser posible.

Ofrezca agua y comida abundante. La deshidratación es especialmente peligrosa durante el invierno.

Cuando estén al aire libre, manténgalas bien arropadas. Limite el tiempo al exterior, y límpielas rigurosamente (incluyendo las patas) antes de entrarlas.
